Advantage of ePosterBoards rental service:

- Presenters can transport their e-posters on multiple digital devices.
- Less expensive than printed paper posters.
- Allows for interactive e-posters with multiple pages, videos and 3D models.
- IT assistance to optimize e-posters before and during the conference.
- A green technology with the elimination of paper posters.

Disadvantage of conventional poster presentation methods:

- Expensive printing and transportation costs for both the meeting planners & attendees.
- Presentation design constraints- only 2 dimensional.
- Risks of damaging the presentation during transport.

ePosterBoards offers a dynamic, innovative solution for the concessions and problematic issues associated with conventional paper posters.

• Meeting attendees can prepare their presentations on their own software (PowerPoint or the Keynote app) ahead of time.

• Presenters can transport their digital presentations to the meeting, using miniature digital storage or hand-held devices (flash drives, iPhones, iPads, laptop computers, etc.).

• Our ePosterBoards service provides rental of large format, 47 inch flat panel monitors (along with on site technical support during poster sessions).

• ePosterBoards provides the necessary cable connections to allow the presenters to display their presentations with minimal effort (essentially plug-and-play).
